

Intelligent Robotic Testing and Inspection System
Testing Equipment Developer and Manufacturer
For Paint, Coating & Ink

Film Applicator

- Advanced touch screen technology
- Film size defined
- Adjustable speed
- Report output

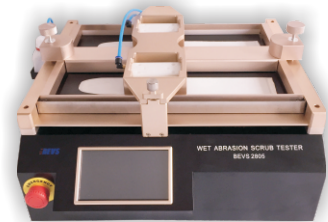

BEVS Intelligent Testing & Inspection System

- Cost-saving and efficiency-increasing:
Shorten the research and testing period, reduce the human error, improve the production efficiency and decrease the labor cost etc.
- Wide application:
Cover almost all the coating classification, idea for user to choose freely.
- Full test:
Complete the testing automatically from sampling to original status, application performance, mechanical property and resistance weathering aging. User could choose the testing project upon the request.
- Automatic QC inspection:
The combination between robot and testing equipment to achieve the automatic QC control.
- Intelligence:
Remote control, sharing, mobile APP control and review.
- Digital:
Output multi-analytic report and chart, more visual and more accurate analysis.

Wet Abrasion Scrub Tester

- Touch-screen control technology
- Scrub times adjustable
- Optional standard accessory

Lab Mixer

- Touch-screen control technology
- Time adjustable
- Frequency modulation motor adoption

Your trusted partner.

We offer the complete and unique products
in paint, coatings and ink industry to meet your challenging
demands of today and tomorrow.
Choose us and you will be more professional.
