

RESIN RAW MATERIAL

PRODUCT	APPLICATIONS
Acrylamide Crystal	Acrylic emulsions
Adipic acid	PU base adhesive, elastomers
1, 4 Butanediol	Polyurethane resin
Benzoic Acid	Alkyd resin
Bisphenol A	Epoxy resin
Castor Oil, linseed oil, coconut oil, soya oil, sunflower oil	Alkyd resin, adhesives
Coconut fatty acid, castor oil fatty acid, soya fatty acid	Alkyd resin
Cyclohexanone	Ketonic resin
Dimer acid	Polyamide resin
Fumaric acid	Polyester resin, modified phenolic & maleic resin
Glycerine (USP/ Technical)	Alkyd resin
Gum rosin	Modified phenolic and maleic resin
Isophthalic acid	Polyester resin
Isocyanate like TDI, MDI and IPDI	Polyurethane resin
Maleic anhydride	Maleic resin and modified phenolic resin
Melamine	Melamine formaldehyde resin
Monomers like BA, MA, MMA, EA, AA, HEMA, 2EHA, 2HEA	Acrylic emulsions and other resin
Phthalic anhydride	Polyester & alkyd resin, Phthalocyanine pigments
Pentaerythritol-95% and 98%	Alkyd resin
Para tert butyl phenol (PTBP)	Pure and modified phenolic resin
Para toluene sulphonic acid (PTSA)	Catalyst in Melamine / Urea formaldehyde resin
Polyether polyol / Polyester polyol	Polyurethane resin
Triphenyl phosphite (TPP)	Catalyst for alkyd and polyester resin
Neo pentyl glycol (NPG)	Polyester resin
Mono propylene glycol (MPG)	Polyester resin
Vam and Styrene monomer	Emulsions
